

Please read this carefully after LAMS.

Precautions after face LAMS

① Flow of fluids

A portion of IV fluid may flow from the surgical site along with blood.
If this happens, wipe it away with clean gauze.

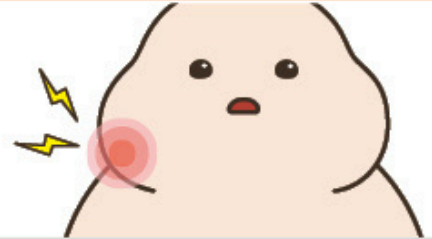

- Avoid doing excessive activities, since it tends to make this symptom worse.

② Pain/Edema/Bruise

These symptoms will disappear gradually within 2-4 weeks.

③ Feeling discomfort

You may feel itchy or numb on the area after LAMS.
It is going to recover fully as time goes on.

④ Lump

The area you got LAMS may become hard.

It is caused naturally by fat extraction and just a part of the progress.
It is going to recover fully as time goes on.

⑤ Band removal

Please change the dermal recovery bandaid that attached to your skin, when it turns white.

- In case you have an allergy reaction, do not use it.

⑥ Compression mask

we recommend to use facial compression garment for 2 months, and particularly wear it for '24 hours' during the first week after LAMS.

- Please use it at all times except for unavoidable circumstances like going out.

⑦ Washing face

Washing face is possible the day after LAMS, along with waterproof band attached to the LAMS injection area, water should not enter the area.
