Precautions after face LAMS

1. Flow of fluids

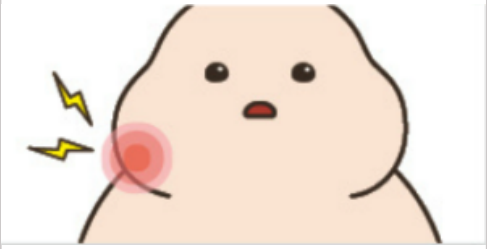

A portion of V fluid may flow from the surgical site along with blood.
If this happens, wipe it away with clean gauze.
Avoid doing excessive activities. since it tends to make this symptom worse.

2. Pain/Edema/Bruise

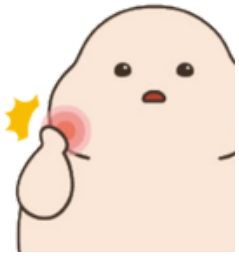

These symptoms will disappear gradually within 2-4 weeks.

3. Feeling discomfort

You may feel itchy or numb on the area after LAMS. It is going to recover fully as time goes on.

4. Lump

The area you got LAMS may become hard. It is caused naturally by fat extraction and just a part of the progress. It is going to recover fully as time goes on.

5. Band removal

Please change the dermal recovery bandaid that attached to your skin, when it turns white. In case you have an allergy reaction, do not use it.

6. Compression mask

7. Washing face

we recommend to use facial compression garment for 2 months, and particularly wear it for “24 hours’ during the first week after LAMS. Please use it at all times except for unavoidable circumstances like going out.

Washing face is possible the day after LAMS, along with waterproof band attached to the LAMS injection area, water should not enter the area.
